

Rumman Ahmed

Computer Engineer

M: +(92) 3173960244 | E: khanrumman820@gmail.com | L: <https://www.linkedin.com/in/rumman-ahmed-bce/>

EXPERIENCE

Computer/Lab Engineer - Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI) 28 Jan-Present

- Provide technical instruction and lab supervision to BS Artificial Intelligence students, supporting hands-on learning in programming, AI concepts, and computing systems while ensuring smooth lab operations.

Business development officer at Telenor Pakistan 17 Dec 2025 – 31 Jan 2026

- Handled operational management of BVS devices at Telenor, including inventory control, Excel-based data tracking, franchise coordination, and support for regional business operations.

Frontend development at Xpert Technology Paid Intern (React.js) Nov 2025 – Dec 2025

- Gained short-term industry exposure at Xpert Technology through hands-on work with React.js, focusing on basic component development, Material UI usage, and introductory Redux state management.

Lab Engineer Paid Intern – COMSATS University Abbottabad Sep 2025 – Dec 2025

- Assisted in microprocessor and embedded systems labs, troubleshooting microcontroller and digital logic issues. Supported AI/ML tasks, Raspberry Pi deployments, and guided students on AI, IoT, and ML workflows.

AI/Autonomous Systems Intern – Aerial Robotics Lab, NUST Islamabad Jan 2024 – March 2024

- Worked on Autonomous Drone Systems, ML-based detection, and UAV mission planning.
- Implemented image classification and segmentation pipelines for aerial imagery.
- Learned integration of AI/ML/DL models with Pixhawk-based drones for waypoint navigation and automation.
- Collaborated on UAV hardware tuning, flight control testing, and edge deployment techniques.

PROJECTS

Plant and Weed Detection using Machine Learning for Precision Agriculture (Final Year Project) 2024- 25

- Built a UAV system integrating AI segmentation + classification models for precision agriculture.
- Implemented Raspberry Pi communication, IoT modules, and auto-spraying logic.
- Designed models on Kaggle/Colab and optimized them for real-time inference.

Pedestrian Detection for Smart Crosswalk System using YOLOv5 -- Subject: Machine Learning 2023

- I Develop an intelligent pedestrian crossing system using YOLOv5 for real-time person detection on crosswalks via camera.
- Demonstrated object detection, real-time inference, and embedded automation for smart city applications.

Gesture-Controlled Volume Adjustment using MediaPipe + KNN -- Subject: Digital Image Processing 2023

- Integrate Computer Vision and ML (MediaPipe + KNN) for real-time interactive signal-to-action workflows.

SKILLS

- **Machine Learning / AI:** TensorFlow, Keras, Deep Learning, Computer Vision
- **Programming & Automation:** Python, Java, C/C++, Bash/PowerShell (basic scripting)
- **Embedded Systems:** Arduino, IoT-based automation, microcontroller projects
- **Networking & Systems:** LAN/WAN, TCP/IP, DNS/DHCP, VPNs, Linux & Windows administration
- **Cloud & Deployment:** Kaggle, Google Colab, Raspberry Pi, Edge AI deployment
- **Databases:** MySQL, SQL basics, MS Excel
- **Tools:** Git, Jira, Confluence, MS Office, MATLAB, Mission Planner

EDUCATION

COMSATS University Islamabad BS Computer Engineering – CGPA: 3.43/4.00

Tameer-i-Wattan College, Abbottabad F.Sc Pre-Engineering – 848/1100 Marks (2021)

CERTIFICATIONS

- **Internship – Aerial Robotics Lab, NUST Islamabad** (Drone Tech, AI, Autonomous Systems)
- **Web Development Certificate – Cardiff Academy (6 Months)** (HTML, CSS, JavaScript, WordPress, Fiverr)
- **Workshop – PCB Design, UAVs & Autonomous Systems**
